

QUESTION

The image displays a 20x10 grid of Braille characters. The first 18 rows consist of standard Braille patterns, including various numbers, punctuation, and letters. The final two rows (rows 19 and 20) feature Braille characters with red dots, which may represent a specialized Braille system or a modified set of characters. The grid is organized into 10 columns and 20 rows.

A 10x10 grid of 100 dots arranged in a 10x10 pattern. The dot at row 3, column 1 is highlighted in red.
